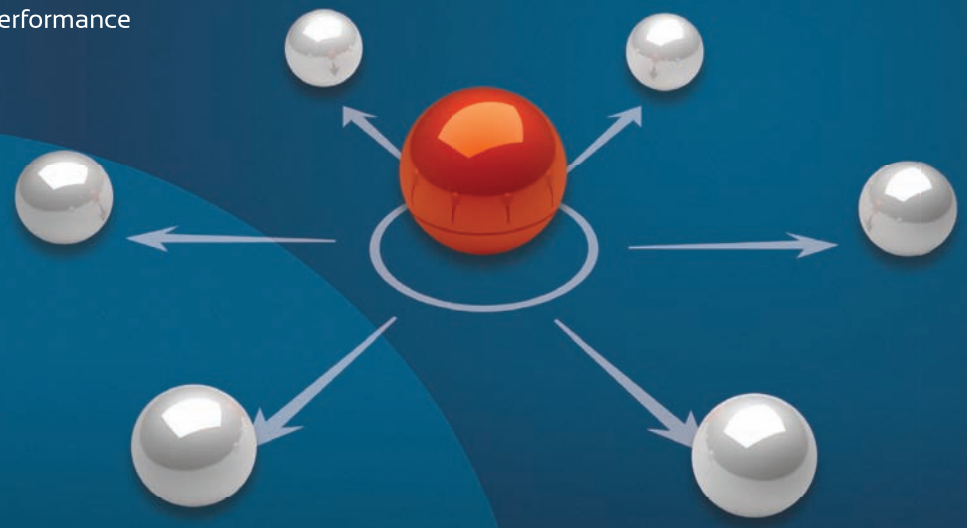
ValueMetrics
Improving Business Performance



ValueMetrics Performance Management

Gain control and visibility of your business performance through our state-of-the-art Visual Analytics.

ValueMetrics Performance Management solutions provide visibility and control of key performance metrics of the business allowing management to make informed and accurate decisions ensuring the business can respond effectively to changes in your economic environment.

With our expertise we can enable you to gain visibility and real perspective of operational performance, and help you prevent performance failures. You will be able to visually analyse your business performance through the following:

- Qualitatively and quantitatively determine the performance of your supply chain operations
- Identify where the areas of improvement exist
- Understand what the expected payback of implementing the recommendations would be
- Provide you with an understanding of how to implement those recommendations

Performance Dashboards

ValueMetrics Performance Dashboards allow you to intuitively visualise and translate performance reports and data, enabling you to make quick reliable decisions on a daily basis. We design, develop and implement a Performance Dashboard that will embed and cascade your strategy so that you are sure that it is directing operational decision making and execution.

Our Dashboards provide you with:

- A single consolidated view of all your reports, data and Scorecards that is easy to understand
- Real time relevant strategic and operational information
- A high level of interactivity
- Clear Identification of any potential performance issues within the business operation
- Drill-down capability

NB. Once visibility is made through our Performance Dashboards we can assist you in performing "what if" analysis to establish and review the impact of potential change.

Balanced Scorecard with KPI Excellence

Before the implementation of a ValueMetrics Balanced Scorecard, we can assist with defining and developing your KPI's to ensure that they are fully supportive of overall company strategy. Our Balanced Scorecard provides you with a user friendly method of establishing business performance levels, with confidence that the data used and presented are consistent, accurate and current.

ValueMetrics Balanced Scorecards provide an essential visual tool for management in demonstrating the performance of your businesses KPI's against goals, whether strategic or operational. We have an extensive library of pre-configured metrics and scorecards ready for rapid deployment within any business operation, so that you can start to view the performance of your business's KPI's instantly.
