

SAP System Analysis

Optimising your SAP investment

Saving you money and time

Mergers, company expansions, required upgrades and custom developments may have put you out of touch with how your SAP system is being used. We can help. Our SAP System Analysis provides a comprehensive understanding of your SAP solution landscape that can save you money and time to optimise the use of your SAP system. We will assist you to effectively utilise your SAP system to enable the realisation of your targeted business outcomes.

Key benefits

- Assist to reduce total cost of ownership of your SAP solution
- Identify SAP optimisation potential by re-documenting how SAP is currently used
- Analyse your current software license cost to identify reduction potential
- Reduce risk by segregation of duties analysis
- System comparisons as the basis for future process standardisation and consolidation
- System preparation for SAP S/4 HANA

What do we do?

ValueMetrics offers a unique, comprehensive SAP system analysis that fully examines how SAP is being used, segregation of duties, license allocation, custom developments and reports. It results in the generation of the as-used SAP process models to create an updated business process repository.

The benefits from realising the potential for optimisation tend to far exceed the cost of the system analysis.
