

Master Your Inventory & Demand Planning with Slimstock & ValueMetrics

Intelligent Optimisation for Maximum Profitability

In today's highly competitive market, inventory is much more than just stock - it's working capital, customer satisfaction, and competitive advantage. With Slimstock, your business can achieve the perfect balance between demand and supply, ensuring optimal stock levels, reduced waste, and increased profitability.

With Slimstock, you can look forward to accurate demand forecasting, automated replenishment, real-time stock visibility, and full end-to-end supply chain management. Whether you operate in retail, wholesale, distribution, or manufacturing, Slimstock's predictive analytics and automation keep your supply chain resilient and efficient.

slimstock

Get the Competitive Advantage with ValueMetrics Consulting's implementation expertise, powered by Slimstock.

AI-Powered Demand Forecasting

Predict customer demand with pinpoint accuracy, minimising stockouts and excess inventory.

Forecasting & Replenishment (S&OE)

Ensure short-term execution aligns with demand planning through automated stock adjustments and dynamic replenishment strategies.

Seamless ERP & Supply Chain Integration

Connect Slimstock with your existing systems to create a unified, real-time inventory and demand planning platform.

Scalable for Any Industry

Whether you're a retailer, distributor, or manufacturer, Slimstock adapts to your needs and scales with your business.

End-to-End Inventory Optimisation

Manage stock levels dynamically across your entire supply chain for cost efficiency and peak performance.

Sales & Operations Planning (S&OP)

Align supply and demand over the mid-to-long term with integrated sales and operations planning, ensuring optimal resource allocation.

Improved Working Capital & Profitability

Reduce excess stock, lower carrying costs, and free up capital for business growth.

**Reduce
Inventory Costs**
